Members of GM Toledo Propulsion Systems Unit:

We attended a Strike Assistance class and wanted to share with the membership the changes our International Union has made if we were asked to go on strike. Most of you already know, the strike pay is \$500 per week and starts on the first day of the strike. The strike pay will be a direct deposit into your bank account and no paper checks will be issued. This means you will need your financial institution's routing number and account number to where you would like this deposited.

The biggest change we learned is that you must register for the strike electronically and have an active email address. To register you will need a Social Security number, birthdate and current medical coverage for yourself, spouse and all dependents. If a strike is called, the Local 14 Union Hall will have some computers set up for our members and we will assist you through this process. The International highlighted the importance of accuracy. If you make any mistakes when registering, you will need to contact the International Union to make the changes, and this could delay your strike pay. We will provide you with further information on the registration process prior to the contract's expiration date.

In order to qualify for strike pay and health care, you must participate in the scheduled strike activities. Local 14 UAW will need to electronically verify that you participated in the strike before you will receive these benefits.

Your health care will continue for you, your spouse and dependents. The cost for the health care is paid out of the Strike Fund. However, you will not have any dental, optical or audio coverage during a strike. Please make sure you get your appointments out of the way before September 14, 2023.

Lastly, if you recently moved or changed your phone number, or if you hear of someone that does not get our text messages, please ask them to contact the Union Hall.

In Solidarity,

Tony Totty
President, Local 14 UAW

Sue Rodgers
Financial Secretary, Local 14 UAW
