Safety in the New Year

Mark Bande, Assistant Plant Director

The holiday season has come to an end and the start of the new year is an important time to refocus our priorities and concentrate on the safety of ourselves and our team.

"Make sure you are doing your part to make sure everyone goes home safe: every day!"

Keep your mind on the job

Being distracted leads to mistakes which can result in harm to yourself or your workmates.

Stay Healthy

Ensure that you are getting at least 8 hours of sleep, keeping well hydrated and exercise regularly.

Report all hazards and near misses

Reporting hazards enables us to fix problems before someone gets hurt. If you see something, say something.

Lead Change

If you can see a way to improve safety, talk to your Supervisor, Safety Representative, or WHS Coordinator about your ideas.

REMEMBER: Safety is everyone's responsibility. Make sure you are doing your part to make sure everyone goes home safe: every day!

Happy Safe New Year!

Mark

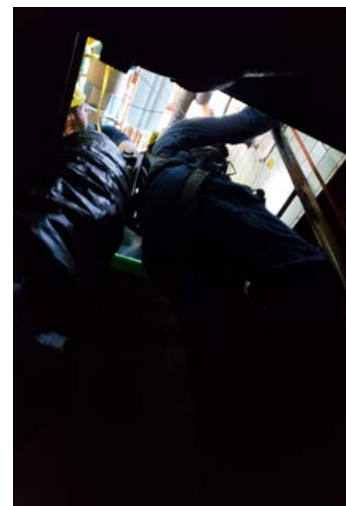

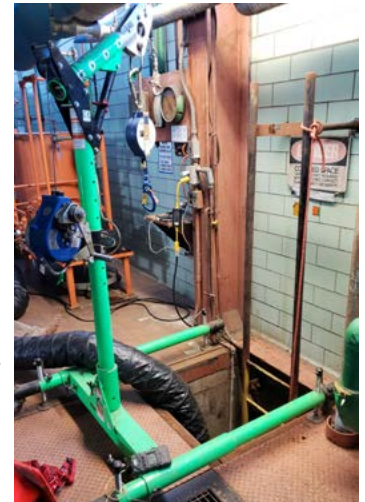

December Emergency Response Training

The annual confined space training was conducted last month by our Joint Training staff. This training is required to comply with the OSHA regulations.

OSHA Requirements

Ensure that affected employees practice making permit space rescues at least once every 12 months, by means of simulated rescue operations in which they remove dummies, manikins, or actual persons from the actual permit spaces or from representative permit spaces.

Representative permit spaces shall, with respect to opening size, configuration, and accessibility, simulate the types of permit spaces from which rescue is to be performed.

Team Leader GMS Training

Next week with the help of the GMS Core Team the plant will begin the 40 hour TL GMS training. This training will cover the five principles of GMS and will take 5 days to complete. This training will give the Team Leaders and Group Leaders a better understanding of their GMS roles by explaining each of the Elements in detail.
