

Distracted Driving

Distracted driving is the practice of driving a motor vehicle while engaged in another activity, typically one that involved the use of a mobile phone or other electronic device.

"Take the time drive distraction free, you and your loved ones are worth it."

Did you know...

1. Distracted driving accounts for 25% of all motor vehicle crash fatalities
 2. Driver distraction is responsible for 58% of teen crashes
 3. Roughly 380,000 injuries are caused by distracted driving
 4. 3,500 people are killed each year in distracted driving crashes, that's 9 people a day in the United States
 5. It takes only 3 seconds after a driver's attention has been diverted from the road for a crash to occur
- Some thoughts to help you focus on the road
1. Use your cell phone for emergency situations only. Even using a hands free device takes your mind off of driving
 2. Avoid eating while driving
 3. If you are drowsy, pull off the road
 4. Finishing grooming at home. Shaving and Make-up are easier to do in front of a bathroom mirror.
 5. If you have passengers, enlist their help so you can focus safely on driving.
 6. Make sure kids and pets are properly secured before driving

Before driving please take a second to remember that distracted driving can happen to anyone, but it is 100% preventable. Take the time drive distraction free, you and your loved ones are worth it.
